Aayush Chourasiya

Senior React JS & React Native Developer

+91-8458836888   aayushchourasiya.work@gmail.com   India, Indore

Professional summary

React Native & React JS Developer with 4+ years of professional experience, specializing in building high-performance, scalable, and pixel-perfect mobile and web applications. Skilled in leading engineering teams, architecting complex frontends, optimizing performance, and delivering high-quality production-ready apps across multiple domains including **Real Estate, Food Delivery, FinTech, EdTech, and Fitness**.

Strong mentor with a track record of improving development processes, conducting code reviews, and implementing best practices in **JavaScript/TypeScript, state management, API integrations, and CI/CD pipelines**. Experienced in collaborating with cross-functional teams and managing full SDLC cycles on tight timelines.

Experience

React JS & React Native Developer   October 2021 - Now

Thoughtwin IT Solutions, India, Indore

- Led **multiple squads (8–11 developers)** to plan, architect, and deliver complex mobile & web apps with reusable UI components and scalable architectures.

- Delivered **10+ production applications** in domains like Real Estate, Food Delivery, FinTech & EdTech, ensuring performance and stability.

- Improved app performance by **20–40%** through optimization, code refactoring, and efficient state management.

- Migrated legacy codebases from **OOP to modern functional patterns-**, significantly reducing code complexity.

- Integrated **Firebase & Supabase** services including real-time databases, authentication flows, push notifications, and cloud storage.

- Successfully conducted **code reviews**, improved team coding standards, and maintained consistent architecture across projects.

- Worked closely with product managers, designers, and QA teams to implement clean UI/UX and ensure pixel-perfect builds.

- Deployed and maintained applications on **App Store & Google Play-**, collaborating with QA for regression and release cycles.

- Delivered training to juniors on React Native, Redux, debugging flows, and clean code principles.

Education

2017 - 2020

Bachelor of Computer Applications of DAVV, India, Indore

2017 - 2021

GNIIT Certification of NIIT, India, Indore

Projects

Wasalt – Real Estate Mega Platform (React Native)

Link :
https://play.google.com/store/apps/details?id=com.wasalt.app&hl=en_IN&pli=1

- Led **two squads** and coordinated with international stakeholders.
- Developed modules for bidding, buying/selling, live auctions, and map integrations.
- Implemented location-based search, caching, and offline capabilities.
- Provided training to freshers and ensured high code quality.

Candid-i – Job Search & Posting Portal (React JS + Firebase)

Link : https://www.candid-i.com/

- Built the entire frontend for employer & candidate dashboards.
- Integrated Firebase authentication, real-time updates, and resume upload features.
- Fully responsive UI with advanced search filters.

Alyke – Friendship & Social Discovery App (React Native)

Link : https://play.google.com/store/apps/details?id=com.alyke&hl=en_IN

- Developed the entire mobile frontend **single-handedly** using React Native.
- Built UI flows for **interest-based matching**, "vibe" profiles, and friend discovery.
- Implemented onboarding, profile creation, filters, and privacy-focused screens.
- Integrated APIs, handled state management, and optimized overall app performance.
- Delivered smooth cross-platform experience with reusable components, animations & clean architecture.

SheKunj – Online Learning Portal for Women (React JS)

Link : http://shekunj.com/

- Worked as the sole frontend developer.
- Built dashboards, course modules, and interactive UI with React JS.
- Integrated APIs built in Python.
- Created mobile-responsive and accessible UI.
